

## QCB Marina 2021

In 2021 the marina was improved with the help of many volunteers. All vessels remaining on racks at the end of the season were relocated so work on the racks could take place. The racks were moved and rebuilt with braces. The subgrade was cleaned and regraded, covered with anti weed material, a layer of stone was placed, and the racks were reset.

Several new racks were built to accommodate larger boats near the water and paddleboards / kayaks. Launch ramps were rebuilt and additional stone was placed and graded in areas along the shore, in the boat turn around, and drives.

Clearing of weeds and vines opened up areas to be utilized.

The gate was sanded, primed and painted – rust doesn't stop at the beach!

An auction for abandoned vessels was held in August.

A Fall cleanup will be scheduled in October.

The new decal issuance program was a challenge during the pandemic but about 190 decals were requested.
