

## **QUONONCHONTAUG CENTRAL BEACH FIRE DISTRICT**

**November 11, 2019**

**Dear Greetings!**

**There has been a misunderstanding on my part about the water tank chlorination. This was planned as a two part distribution disinfection. The first part was performed last Tuesday and Wednesday and the second part will be performed this afternoon into tomorrow.**

**The disinfection process also requires that we limit water flow this evening. Please therefore keep water usage to a minimum Monday evening. Again expect to smell or taste residual chlorine for the next two days and consider using bottled water for drinking.**

**We remain on a boil water advisory.**

**Vincent Reppucci  
PW Chairperson**
