

Webmaster Report 2019  
Quonochontaug Central Beach Fire District

In June 2019 our website was converted from a non-secure to a secure https website. This was performed by our Information System partner, Brave River Solutions. This project helps protect our website from hackers and phishing of personal information including our directory information: addresses, phone numbers and email addresses.

This spring, in preparation for an updated printed directory, we had a major initiative to have members update their online directory information. There was a huge positive response to this initiative- thank you. The information for the printed directory was generated from the website information and ready for printing and for the Merchandise Sales Committee by late June.

Our website, Quonniecentral.org continues to provide valuable information regarding our community including:

- Calendar of events and meetings
- Directory (password protected)
- Social event information
- Recreation information
- Information about services provided in Quonnie Central Beach and locally
- Information about Quonnie Central Beach including our governance, budget, and minutes of meetings
- Photos

Reminder: Your email is your user name. If you forgot your password simply click on "Forgot your password?" and follow the prompts. You are encouraged to update the information in the Directory as needed to keep it accurate and up to date.

Respectfully submitted,  
Betty Wilson, QCBFD Webmaster.
